

Breast Screening

Mammograms are offered to all people assigned female at birth between the ages of 47 to 74 and repeated every 3 years.

If you're due to have a mammogram, you'll receive an invite letter in the post, it's important you don't ignore it.

Signs and symptoms of breast cancer may include:

- ⇒ A breast lump or thickening that feels different from the surrounding tissue
- ⇒ Change in the size, shape or appearance of a breast
- ⇒ Changes to the skin over the breast, such as dimpling, redness or pitting that looks like orange peel
- ⇒ A newly inverted nipple
- ⇒ Peeling, scaling, crusting or flaking of the pigmented area of skin surrounding the nipple (areola) or breast skin

If you missed your previous appointment or are unsure if you are due a screening, please contact **28000** and we will book you an appointment if you're due.

If you notice any changes to your breasts, tell your GP. Finding it early makes it more treatable and could save your life.

Contact the King Edward VII Memorial Hospital on **28000**.
